Riyadh, Saudi Arabia

PROFESSIONAL SUMMARY

8 years of software development and technical leadership experience in POS payment applications and Terminal Management Systems (TMS). Proven track record delivering EMV card scheme certifications (Visa, Master card, GCC, Rupay, JCB, Mercury, CUP) and Android-based payment applications across Newland, VeriFone, and Ingenico terminal platforms, spanning the full POS system lifecycle from design and development through deployment and customer support.

CORE COMPETENCIES

Languages	C, C++, Java (Android)
IDE / Tools	Android Studio, IngeDev, VeriFone (ADK, Evo SDK), Eclipse, Visual Studio, SVN, Redmine, Bit bucket, Jira, Code Compare
Protocols	NEXO, EMV, Postilion, ISO 8583
Domain	Payment interfacing with banks and processors; EMV card scheme certification
Platforms	Newland, VeriFone (Linux & Android), Ingenico (Telium, Tetra, Evo)

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Jul 2023 – Present

InterSoft Co. — Riyadh, Saudi Arabia

Current Project: Android Payment Application (Soft POS, Newland – N910)

Leading development of MADA Soft POS, resolving MADA NEXO host connectivity issues (reversals and advices across TMS1/TMS2), and delivering Sale, Void, Refund and Loyalty Platform transactions.

- Completed JCB and NEXO protocol certification with SAMA.
- Led Android Room database migration across DB versions.
- Implemented Apple Wallet loyalty card reading.
- Developed ECR-based transaction flows.
- Built loyalty program functionality to fetch encrypted PIN and PAN.
- Delivered settlement and transaction batch reporting; supported unattended Android devices for KIOSK and MDB protocol.
- Owned deployment and customer support for the payment application.

Senior Software Engineer

Mar 2020 – May 2023

Marshal Fintech Partners (LLC) — Dubai, UAE

Android Payment Application (X990)

Developed Magnati Pay (utility and service bill payments) with Collinson Loyalty and instant discount offers, resolving Postilion ISO host connectivity issues including reversals and advices.

- Delivered EMV certification for Rupay, JCB, Mercury and CUP card schemes.
- Built Bluetooth and Wi-Fi ECR-based transaction integrations and transaction APIs.
- Implemented EMV card-based Postilion host connectivity.
- Delivered Sale, Void, Refund, DCC and EPP services, plus Brand Affinity and Reward Sale loyalty features.
- Produced settlement, detail and summary batch reports; supported deployment and customers.

Mid-Level Software Engineer

Mar 2020 – May 2023

*Marshal Fintech Partners (LLC) — Dubai, UAE***Android Payment Application (X990 – V1, V2 and VX series)**

Built payment applications for VeriFone VX series and Android devices, including EDW and Noon QR Wallet integrations.

- Delivered Sale, Void, Refund, Pre-Auth and Pre-Auth Completion, DCC and EPP functionality.
- Completed certification for the Linux-based NOL payment device (Dubai public transport card payment).
- Built ECR features and an e-receipt API for email/SMS transaction receipts.
- Produced settlement and transaction reporting on live portals; supported deployment and customers.

Software Engineer

Mar 2018 – Feb 2020

*Girmiti Software Pvt. Ltd. — Bangalore, India***Gift and Loyalty Application on VeriFone and Ingenico Devices**

Developed gift card issuance, reissuance, redemption and recharge features on VeriFone VX, Telium (iCT220) and Tetra (MOVE2500) devices, supporting both standalone and ECR-integrated modes.

- Implemented Initialization, Sale (card activation), Void, Reissuance, Recharge and Settlement flows.
 - Built LibCurl-based JSON communication with the host system.
 - Delivered ECR integration and provided UAT/production deployment support.
-

EDUCATION**B.E., Computer Science & Engineering**

KLN College of Information Technology, Anna University (2014 – 2018)
